Press Release

World Congress on Nanomedicine 2026 in New Delhi
from 27-30 September 2026

The Embassy of India, Tashkent is pleased to inform that the Institute of Nano Medical Sciences (INMS), University of Delhi, will host the World Congress on Nanomedicine (WCN 2026) from 27–30 September 2026 in New Delhi, India. The Congress will be held under the chairmanship of Prof. Roger D. Kornberg, Nobel Laureate, and organized under the aegis of the International Society of Nanomedical Sciences (ISNS) and the International Society for Nanomedicine (ISNM), with support from leading national and international academic institutions, government funding agencies, and the pharmaceutical industry.

The Congress is expected to bring together more than 2,000 participants, including eminent scientists, researchers, clinicians, academicians, industry leaders, and students from around the world. It will provide a premier international platform for sharing cutting-edge research, fostering scientific collaboration, and exploring the latest innovations in nanomedicine.

The event will feature lectures and discussions by internationally renowned scientists and Nobel Laureates, and several other globally recognized experts.

The scientific programme will cover a broad range of emerging topics in nanomedicine, including targeted drug delivery, nanoparticles for diagnostics, nanomedicine in cancer treatment, regenerative nanomedicine, precision nanomedicine, nano biophotonics, artificial intelligence in nanomedicine, nano biosensors and medical devices, law and nanomedicine, radiation nanomedicine, development of nasal spray technologies for rapid stroke aid.

Universities, research institutions, scientific organizations, faculty members, researchers, clinicians, and students from Uzbekistan are encouraged to participate by submitting research abstracts and registering for the Congress. The event offers an

exceptional opportunity to engage with leading experts, showcase innovative research, establish international collaborations, and contribute to the advancement of nanomedicine.
